

Software Developer Customer Projects (m/f/d)

Permanent employee, Full-time · Remote work, ideally based no further than a two hours drive from Kaiserslautern

ABOUT ARXUM

As a globally active start-up, we enable our customers and partners to automate business processes across companies using blockchain technology.

ARXUM's use and application of blockchain technology is a globally unique asset that has been recognised by several independent reviews. As ARXUM is working with distributed ledger technology, the company also implements this distributed approach in the company's business operation. Already before Covid-19 restrictions, ARXUM provided extended possibilities for regular and extended phases in home office or local offices to its employees. At the same time team spirit is important for a cohesive team and successful company growth. The ARXUM team consequently has regular physical meetings with all team members and fosters an intensive and direct exchange while in local working environment.

Working with ARXUM, you will experience:

- A joint team spirit
- A consistent collaborative effort for value oriented work results on all levels
- Strong personal autonomy in working style, decision making and work/life integration
- Trust and esteem among colleagues and a concise and friendly communication

ABOUT YOUR ROLE

Do you like to take on responsibility and are you interested in trying out new technologies and realising your own projects? As a software developer, are you looking for a task with freedom in which you can live out your enthusiasm for software development? Then join our team and realise our projects for our costumers and research projects. You will have the opportunity to shape your role and have a very big impact on our business and growth. You will work directly with our software developers and you will have profound short and long-term impact on our company's ARXUM® Suite.

If you do not match 100% of the requirements, but you think you fit this role, we encourage you to apply anyway. We value the right people and search based on your personality, potential and motivation to learn and grow. Together we can adapt the role in a way that is meant for you!

WHAT YOU WILL DO

- Develop a deep understanding of our multi-functional and innovative blockchain-based software suite
- Shape our ARXUM® Suite for optimised scalability, resilience and cyber-security.
- Design, develop, test, maintain and improve our software solution for specific customer needs
- Work directly with our customers in order to understand their requirements, prepare solution proposals in close cooperation with product management and business development
- Continuous improvement of internal processes
- Integrate with our software development team and business developers and participate in regular sprint and grooming sessions

YOU SHOULD APPLY IF YOU HAVE

- Excellent knowledge of the current programming language, such as Javascript, HTML/CSS, or e.g. C# and relevant frameworks, such as e.g. Angular, Git, Jenkins
- Ideally full stack development experience in front-end, back-end development, data bases etc.
- Knowledge and experience in agile software development
- Experience with optimising delivery processes and accelerating quality performance
- The ability to profoundly and quickly grasp technical and scientific problems and to derive sound solutions
- The ability to break down complex technical tasks in simple terms as well as an independent working style
- Fluency in English

NICE TO HAVE

- German language skills
- Potentially been already in contact with blockchain technology
- Experience in cloud technologies, such as AWS, Azure, gCloud, etc.

WHAT WE OFFER YOU

- You get to choose your place of work (as long as it is in reachable distance for regular team meetings)
- Join a fun and diversified team of smart and result driven people of various backgrounds
- Competitive salary with additional benefits
- 30 days holiday
- Flexible working hours in accordance with trust-based working hours
- Opportunity to enter positions of responsibility during ARXUM's growth
- Hardware of your choice (e.g. MacBook)
- Corporate Railway Ticket (Bahncard)
- Personal budget for conferences, trainings and courses
- Regular team meetings & lunch or social events

MORE ABOUT US

You will be embedded in a very diversified team of positive minded colleagues each with different professional careers and backgrounds.

In order to further diversify our team and in order to foster interdisciplinary views and mind sets, we would like to encourage qualified candidates of all genders and cultural backgrounds to apply!

APPLY NOW

We look forward to receiving your detailed application (motivation & CV), including an indication of your salary expectation, sent exclusively by email to: hr@arxum.com.
